Casey Kelly

Senior Software Engineer

Denver, CO · casey.kelly819@gmail.com · 303-885-8092 · caseyjkelly.com · github.com/caseykelly · linkedin.com/in/caseyjkelly

SUMMARY

Frontend-focused senior engineer with 10+ years building React and TypeScript products in regulated fintech and healthcare payments. I've built design systems and component libraries, led accessibility work, and set frontend standards through mentorship and code review. I use AI-assisted development daily and have shipped Go automation, so working across the stack comes naturally.

EXPERIENCE

Senior Software Engineer, Paytient — Apr 2024 – Present · Remote

Healthcare payments platform (Series B); 2026 MedTech Breakthrough Award, Best Patient Experience Solution Provider

- Helped build and launch the Medicare Prescription Payment Plan (M3P) portals in eight months for the Jan 1, 2025 national go-live, which ran without issues at midnight. Led their accessibility compliance ahead of the regulatory deadline. The program now has the best repayment rate in M3P.
- Shipped pay-without-login using Stripe Payment Links (built link generation and statement emails), generating ~$123K in additional repayment volume across nearly 1,000 payments to date.
- Built flexible autopay draft dates; 52% of members moved their draft date to line up with when funds were available.
- Led the rebrand of the Paytient Operations Portal (POP), the app employers use to administer their benefit, building the shared icon library and theme infrastructure first.
- Worked across the stack in TypeScript/React and Java/Kotlin (over half of tickets on the backend). Carried HITRUST output validation across frontend and backend endpoints through certification. Integrations include Stripe and VGS tokenization; AWS infrastructure managed with Terraform.
- Mentored engineers and championed AI-assisted development. Rated Outstanding (H1 2026) and recommended for promotion.

Senior Software Engineer, Maxwell Financial Labs — May 2021 – Mar 2024 · Remote

Mortgage lending point-of-sale platform; venture-backed, Inc. 5000 (#164, 2022)

- Built borrower-facing features including OCR analysis of uploaded documents, automated underwriting through government-agency APIs, and in-app document editing.
- Made the component library and user-facing apps fully accessible, with Playwright automation to prevent regressions.
- Mentored junior and mid-level engineers and ran weekly group learning on React, TypeScript, accessibility, and modern CSS.

Senior Full-Stack Developer, Sling TV — Mar 2018 – May 2021 · Denver, CO

- Engineering team lead for the shopping cart web experience; rebuilt the cart from Angular to React.
- Built a shared component library to keep design consistent across applications.
- Partnered with Product on analytics and A/B testing so each feature's impact could be measured.

Software Developer, Acumen Digital (client: Sling TV) — Mar 2017 – Mar 2018 · Denver, CO

- Built and maintained the AngularJS front end of sling.com and a Ruby on Rails content-management system.

Site Reliability Engineer, IBM — Jun 2015 – Mar 2017 · Research Triangle Park, NC

- Maintained and upgraded 50+ Bluemix (Cloud Foundry) environments worldwide for enterprise clients, with on-call duty through PagerDuty.
- Wrote automation in Go, Bash, and Ruby.

SKILLS

Frontend: TypeScript, React, Next.js, Redux Toolkit / RTK Query, React Router, design systems and component libraries, theming, modern CSS

Quality: WCAG accessibility (Deque), Playwright, QA Wolf, LaunchDarkly, Datadog (APM, RUM), PagerDuty, disaster-recovery runbooks

Backend: Java, Kotlin, Node.js, Go, Ruby on Rails, GraphQL, REST / OpenAPI, PostgreSQL, MySQL, AWS, Terraform

Payments and security: Stripe, VGS, HITRUST

Ways of working: AI-assisted development, code review, mentoring, RFCs, cross-team technical leadership

EDUCATION

University of Colorado Boulder, Journalism, 2006 – 2010 · **Galvanize**, Full-Stack Software Development immersive, 2015
